June 2006

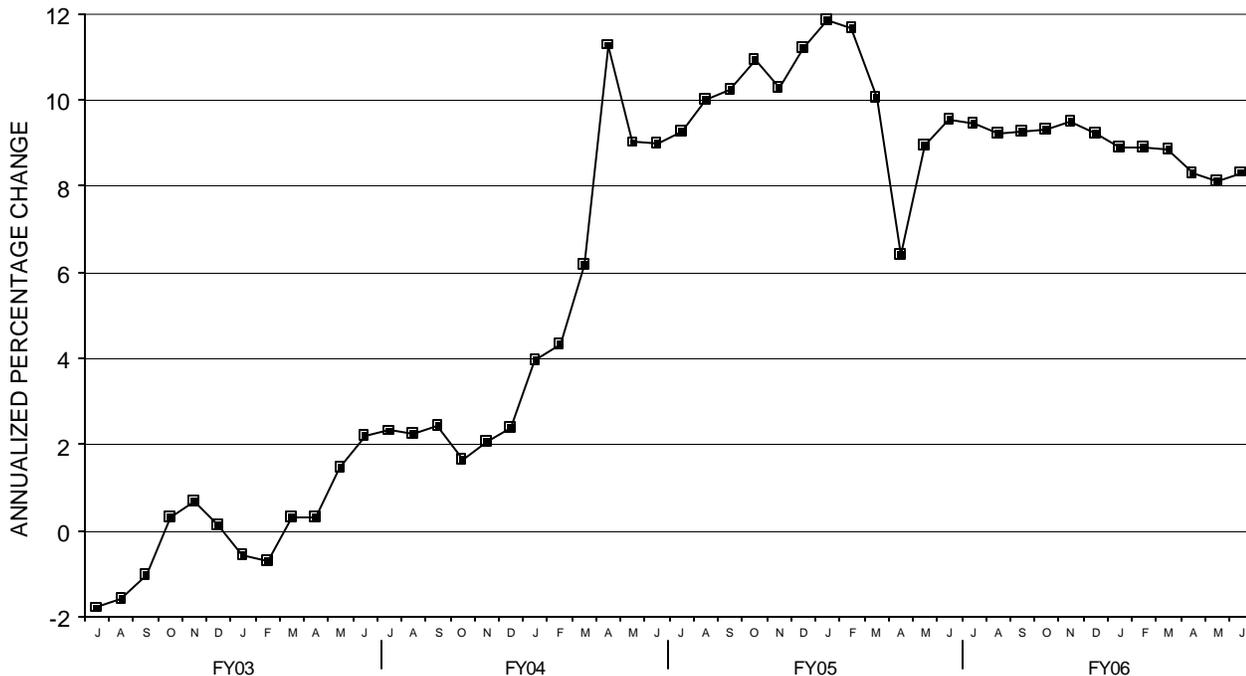

**GENERAL REVENUE SUMMARY: June FY 2006**

After a transfer of \$402.7 million surplus to the Allotment Reserve Fund, year-to-date net available distributed revenues were \$3,825.1 million. These revenues were available for distribution to state agencies.

**Net General Revenue Growth.** Net general revenues are defined as gross general revenues less individual and corporate income tax refunds. For the twelve-month period ending in June, net general revenues totaled \$4,769.2 million and increased at an annual rate of 8.3 percent. ## SPECIAL REVENUES OF NOTE

**Special Corporate Income Taxes.** Each month \$1.6 million (\$18.8 million total in FY 2006) in corporate income tax collections goes to *special* revenues. These revenues are not included in *general* revenue totals. They are allocated to the WorkForce 2000 Fund, which provides for the upgrading of the post-secondary technical colleges of the state.

**Medicaid Program Trust Fund (Soft Drink Tax).** Year-to-date collections totaled \$46.0 million, \$0.03 million less than year-to-date collections in FY 2005.

**Conservation Fund.** The state *general* sales and use tax rate is 4.5%. Effective July 1, 1997, Act 156 of 1997, the Conservation Fund Act, levied a one-eighth of one-cent increase in the sales and use tax rate as a *special* revenue. After deductions, the remaining money is distributed to the Game Protection Fund (45%), the Department of Parks and Tourism (45%), Arkansas Department of Heritage (9%), and the Keep Arkansas Beautiful Fund (1%). Through June of FY 2006, \$58.0 million was collected. Through June of FY 2005, \$53.7 million was collected.

**Property Tax Relief Trust Fund.** Acts 1 and 2 of the Second Extraordinary Session of 2000 levied a 0.5% increase in the sales and use tax rate effective January 1, 2001. This increase is *special* revenue dedicated to reimbursing Arkansas counties for the cost of homestead property tax credits created by Amendment 79 to the Arkansas Constitution. Through June of FY 2006, \$231.6 million was collected compared to \$211.5 million in FY 2005.

**Educational Adequacy Fund.** Act 107 of the Second Extraordinary Session of 2003 increased the state sales and use tax rate from 5.125% to 6.0%, effective March 1, 2004. It also expanded the sales and use tax base to new services and increased the wholesale vending tax rate and decal fees, effective July 1, 2004. Act 94 increased the minimum corporate franchise tax and the tax rate, effective for calendar years beginning January 1, 2004. The additional revenues are deposited as *special* revenues to the Educational Adequacy Fund to be used to fulfill the financial obligations of the state to provide an adequate educational system. Through June of FY 2006, \$439.0 million was collected compared to \$405.4 million collected through June of FY 2005.

## ECONOMIC NOTES

### Most Recent Estimate of GDP Growth

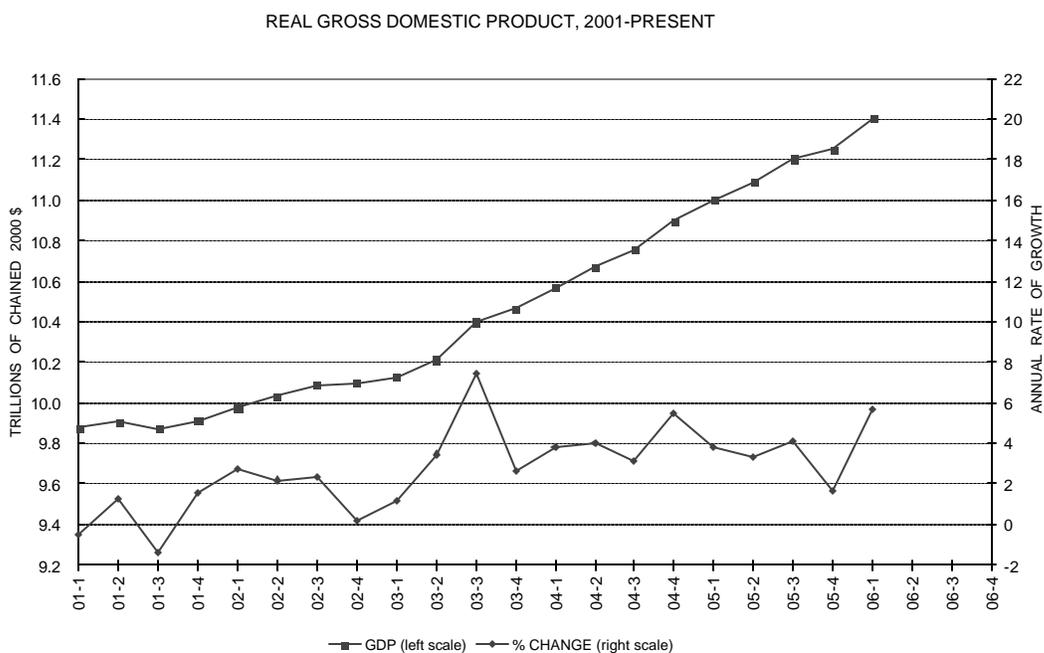

Gross Domestic Product is a measure of the nation's output of domestically produced goods and services. The Commerce Department's estimate of real GDP growth uses the new chain-weighted measure instead of the fixed-weighted measure used previously. The new calculation better reflects yearly price fluctuations.

Quarterly estimates of GDP are released on the following schedule: Advance estimates, based on preliminary and incomplete source data and BEA assumptions about the missing source data, are released in the first month after the end of the quarter. Preliminary and final estimates, which incorporate additional and revised source data, are released in the second and third months, respectively.

The U.S. economy grew at a 5.6% annual rate in the first quarter of 2006 according to the Commerce Department's final estimate for GDP growth. This is a sharp increase from the previous quarter's growth rate of 1.7%. The Department noted that "the acceleration in real GDP growth in the first quarter primarily reflected an upturn in personal consumer expenditures for durable goods, exports, equipment and software, and federal government spending." Based on the latest estimate and prior revisions, real GDP grew 3.5% in calendar year 2005. In comparison, GDP grew by 4.2% in 2004, 2.7% in 2003, 1.6% in 2002, 0.8% in 2001, and 3.7% in 2000.

Quarterly estimates of GDP since the first quarter of 2001, and the annualized growth rates implied by these estimates, are displayed in the graph below.

**Institute for Supply Management's Purchasing Managers' Index (PMI)**

The Institute for Supply Management reported that June's Purchasing Managers' Index eased to 53.8 percent from 54.4 percent in May, but indicated continuing growth in the manufacturing sector. "Manufacturing growth continued in June, and although the rate of growth slowed slightly, renewed strength in June's New Orders Index provides encouragement for the third quarter," reported Norbert J. Ore, C.P.M., chair of the Institute for Supply Management's Manufacturing Business Survey Committee. June data marked the thirty-seventh consecutive month of growth in the manufacturing sector.

The 50 percent mark is generally interpreted as the dividing line between growth and contraction in the manufacturing sector. An index in excess of 42.7 percent, over a period of time, indicates that the overall economy is expanding and under 42.7 percent that it is declining. According to the index, the overall economy grew for the 56th consecutive month in June.

The Purchasing Managers' Index is based on a survey of 300 purchasing officials in a variety of manufacturing industries and gauges improvement or decline in areas such as employment, production, inventory, and new orders. This month's report reflects the U.S. Department of Commerce's recently completed annual adjustment to the seasonal factors used to calculate the indexes.

The chart below tracks performance of the Purchasing Managers' Index since January 2000.

## Labor Force Statistics, Arkansas and the U.S.

The U.S. Bureau of Labor Statistics reported that seasonally adjusted nonfarm employment for the nation in June increased 121,000 to a level of 135.2 million. This follows an increase of 92,000 in the prior month. In June, Construction employment declined by 4,000 with much of the weakness coming from the residential specialty trade contractor category and limited offset provided by the nonresidential specialty trade contractors category. Seasonally adjusted Retail trade employment declined by 6,600 for the month while Wholesale trade employment increased by 7,100. Employment increased by 15,000 jobs in Manufacturing. Employment in Financial activities rose by 3,000 jobs. Education and health services added 26,000 jobs in June including 19,100 in health care employment alone. Government employment added 31,000, with a small decline in Federal Government and moderate gains in State and Local Government. The national unemployment rate held steady at 4.6 percent in June. The rate is down from 5.0 percent in June 2005.

In Arkansas, the Department of Workforce Services reported that nonfarm payroll employment (not seasonally adjusted) declined 100 from May to a level of 1,197,500 in June. Trade employment rose by 800 (+500 Retail, + 300 Wholesale), reflecting seasonal and trend growth. Employment in Manufacturing rose by 1,100. Employment in Educational & Health Services declined by 1,500. Employment in Leisure & Hospitality increased 2,000, largely reflecting seasonal movement. Government employment decreased by 5,500, also reflecting seasonal movement. The Information sector recorded a gain of 100 for the month-to-month comparison, and indicates a small gain of 300 compared to year ago June estimates. The State's seasonally adjusted unemployment rate decreased slightly from 5.3 percent in May to 5.2 percent in June.

Compared to June 2005, payroll employment increased by 15,600, or 1.3 percent. The largest year-over-year gain occurred in Professional and Business Services with a gain of 3,800. The sector with the largest percentage gain was Mining (oil and gas) with 11.6 percent growth, followed by Employment Services with 9.3 percent growth and Warehousing and Storage which was up 6.3 percent. Net job gains were made in all major sectors, except Manufacturing. Manufacturing employment fell by 3,700 jobs (-1.8 percent) from last June. Within Manufacturing, the largest declines occurred in Food Processing (-900), Plastics & Rubber Products (-500), Machinery (-300), and Paper & Printing (-400).

The graphs on the next page place Arkansas' employment growth patterns in a somewhat longer historical context. The upper graph shows the absolute level of nonagricultural employment in the state. The "raw" or unadjusted data show the seasonality of employment in the state, with sharp drops in employment occurring in January and July, while the "smoothed" data (12-month moving averages) reveal the underlying trends in employment.

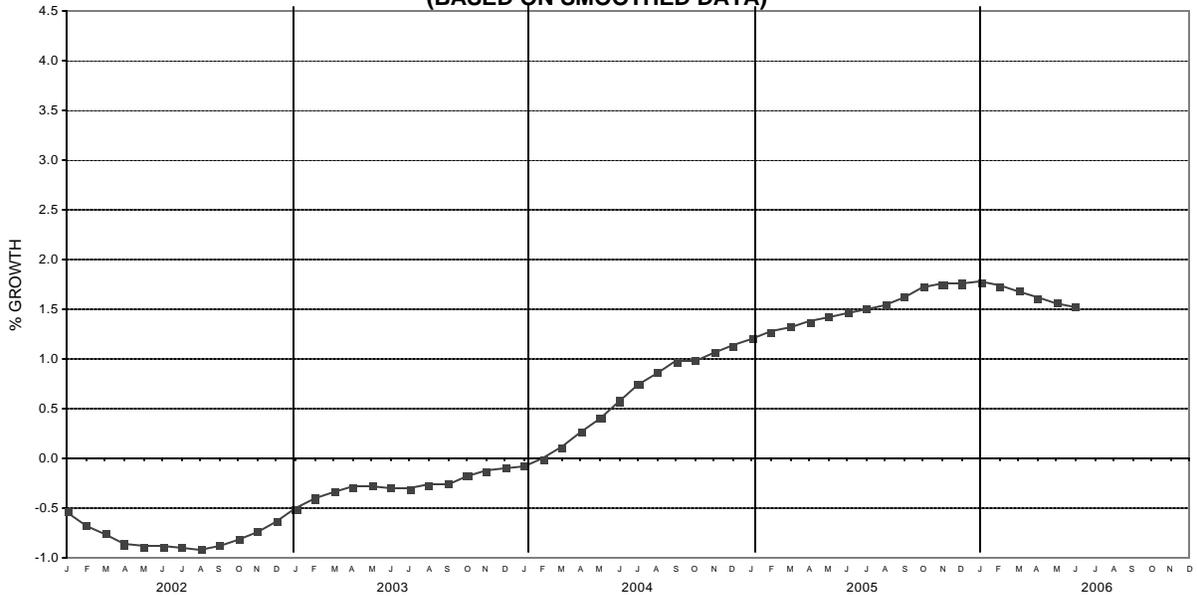

Underlying growth trends are portrayed even more clearly in the lower graph, which gives the percentage increase in employment over a 12-month period, based on the smoothed data shown above. After accounting for some seasonal factors, the annualized rate of employment growth in the state was 1.5 percent in June 2006.

The data in these two graphs reflect the benchmark revisions made by DWS and BLS in January 2006 to the employment data for 2004 and 2005.

## FINANCIAL INFORMATION SOURCES STATE OF ARKANSAS

### FINANCIAL ORGANIZATIONS AND MANAGEMENT

The following state organizations share responsibility for statewide financial management: The General Assembly, the Office of the Budget and the Office of Accounting of the Department of Finance and Administration, the Governor, the Treasurer, and the Division of Legislative Audit.

The General Assembly has responsibility for legislating the level of state services and appropriating the funds for operations of state agencies. The Office of Budget prepares the Executive Budget with the advice and consent of the Governor. The Office of Budget also monitors the level and type of state expenditures. The Accounting Division has the responsibility for maintaining fund and appropriation control and, through the Pre-audit Section and in conjunction with the State Treasurer, has responsibility for the disbursement process. The Treasurer has responsibility for disbursement, bank reconciliation, and investment of state funds (with the advice of the State Board of Finance). The Division of Legislative Audit has responsibility for performing financial post-audits of state agencies.

### BUDGET AND APPROPRIATION PROCESS

State agencies submit biennial budget requests to the Office of Budget of the Department of Finance and Administration. The Office of Budget prepares the Executive Budget based on estimates of general revenues as prepared by the Office of Economic Analysis and Tax Research of DFA. The Executive Budget contains the budget amount recommended by the Governor.

The General Assembly appropriates money after consideration of both the Executive Budget and the revenue estimate. The appropriation process begins in the joint House-Senate Budget Committee and then proceeds through both houses of the General Assembly. Legislative appropriations are subject to the Governor's approval or veto, including the authority of line-item veto.

The General Assembly also must amend the Revenue Stabilization Act to provide for an allotment process of funding appropriations in order to comply with state law prohibiting deficit spending. The Governor may restrict spending below the level of appropriations.

### REVENUE STABILIZATION LAW

Act 750 of 1973, as amended, established the State's Revenue Stabilization Law. This law and related legislation govern the administration and distribution of State revenues.

Pursuant to the Stabilization Law, all general and special revenues are deposited into the General Revenue Allotment Account and the Special Revenue Allotment Account according to the type of revenue being deposited. From the General Revenues Fund, 3% of all general revenues are first

distributed to the Constitutional Officers Fund and the Central Services Fund to provide support for the States' elected officials and their staffs and the Department of Finance and Administration.

The balance is then distributed to separate funds proportionately as established by the Stabilization Law. From the Special Revenue Fund, 3% of all special revenues collected by DFA and 1.5% of all special revenues collected by other agencies are first distributed to provide support for the State's elected officials, their staffs, and DFA. The balance is then distributed to the funds for which the special revenues were collected.

Special revenues, which are primarily user taxes, are generally earmarked for the program or agency providing the related services.

General revenues are transformed into funds established and maintained by the Treasurer for major programs and agencies of the state in accordance with fund priorities established by the General Assembly.

According to the Stabilization Law, the General Assembly establishes three levels of priority for general revenue spending, levels "A", "B", and "C". Successive levels of appropriations are funded only in the event sufficient revenues have been generated to fully fund any prior level. Accordingly, appropriations made to programs and agencies are only maximum authorizations to spend. Actual expenditures are limited to the lesser of (1) moneys flowing into a program or agencies' fund maintained by the Treasurer or (2) the maximum appropriation by the General Assembly.

Because state revenues are not collected throughout the year in a pattern consistent with program and agency expenditures, a budget revolving fund, which receives interest earnings for State fund investments, has been established and is utilized to assure proper cash flow during any period.
