

Transaction ZCA1: CAFR Functional Areas ALV Grid Program Changes

Transaction ZCA1: Report Selections Before ALV Grid Control Program Changes

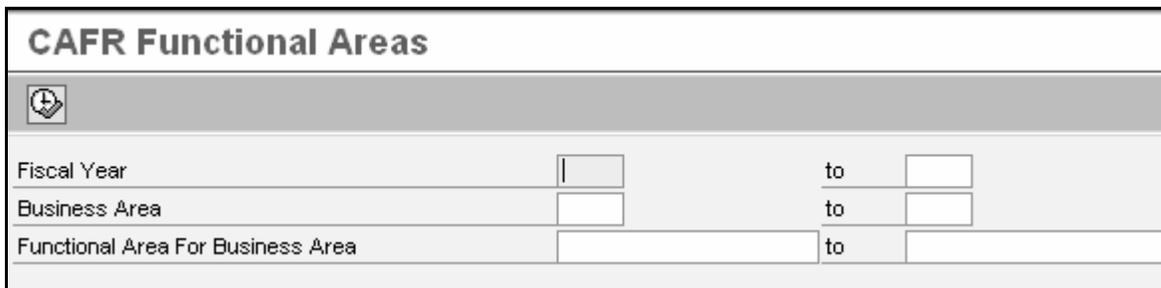

This transaction allowed users to define report output (layout) *prior* to executing the transaction. The output default was “interactive list.”

The screenshot shows the 'CAFR Functional Areas' selection screen. It features a standard SAP window title bar and a toolbar. The main content is divided into two sections: 'Program selections' and 'Further processing options'. In the 'Program selections' section, there are three rows of input fields: 'Fiscal Year' (with a 'to' field), 'Business Area' (with the value '0610' and a 'to' field), and 'Function Area for Bus Area' (with a 'to' field). Each row has a small icon to its right. The 'Further processing options' section contains a list of radio buttons for output options: 'No further processing', 'Display as table', 'Graphics', 'ABC analysis', 'Executive Info System (EIS)', 'Additional query functions', 'File store', and 'Save with ID'. The 'Interactive list' option is selected. There are also three text input fields to the right of the radio buttons. A large black arrow points to the 'Further processing options' section.

Transaction ZCA1: Report Selections After ALV Grid Control Program Changes

Output options are no longer available on the selection screen. Users can still define and save layout preferences but must do so after the transaction is executed.

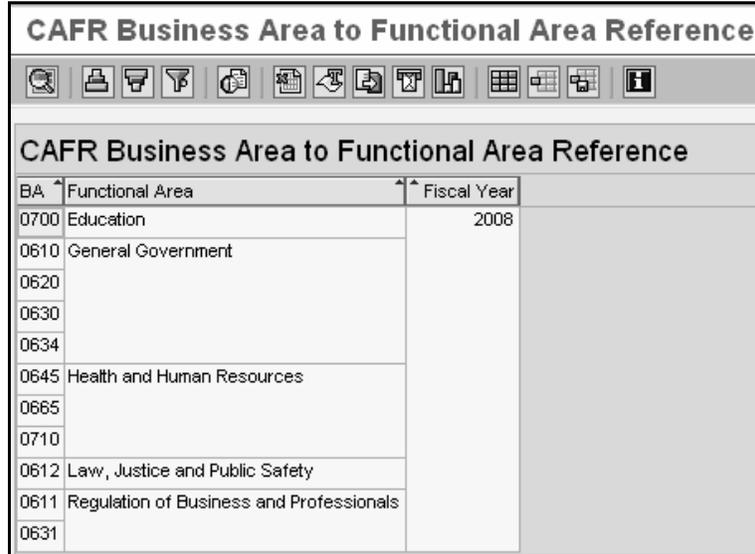

The screenshot shows the 'CAFR Functional Areas' selection screen after the program changes. The 'Further processing options' section is no longer visible, leaving only the 'Program selections' section. The input fields for 'Fiscal Year', 'Business Area', and 'Function Area For Business Area' are still present, but the 'Interactive list' option is no longer available.
