

Arkansas State Revenue offices have implemented a new automated kiosk system in selected revenue offices to simplify the vehicle renewal process. These kiosks are located in revenue offices in Benton, Bentonville, Bryant, Conway, Fayetteville, Ft. Smith East, Jonesboro, Little Rock Central, Little Rock West, Russellville, Sherwood, and Springdale. Persons using the kiosk system can avoid waiting in line and will leave with their new registration and license plate decals in hand.

Also, a public awareness campaign has been initiated to remind citizens of the steps that must be taken before they renew their tags. Citizens can go to www.DueBeforeYouRenew.com to sign up for alerts indicating when it is time to assess personal property, pay property tax, and when their vehicles are due for renewal. This notification system was created using a new app known as Gov2Go and was created in partnership with the Information Network of Arkansas.

State Revenue office employees hope Arkansas citizens find these new tools to be useful when renewing their motor vehicle registration
