## IMPORTANT REMINDERS FOR 2015

Schedule A-Worksheet for Apportionment of Multistate Corporation has been changed. Part B Apportionment Factor, Line 1.c. is now the Average Value of Intangible Property and Line 1.d. is now the Total Tangible Property line.

The 2015 Subchapter S income tax booklet now includes the Form AR1100S and the Arkansas Schedule K-1 that are included with the S return. The instructions for the K-1 are also included in this booklet. The Arkansas Schedule K-1 form has been developed for tax year 2015 for Subchapter S corporations to report each shareholder's share of the corporation's income, deductions, credits, etc. The Arkansas Schedule K-1 will not be required to be submitted for the 2015 filing season. However, if the Arkansas Schedules K-1 are not submitted, there should be a substitute K-1 or other schedules attached to the Arkansas Sub S return indicating each shareholder's share of income, deduction or credits in the same manner as reported on Form AR1100S for Arkansas income tax purposes only. Adjustments to convert federal amounts may be necessary for a number of items including but not limited to capital gains, interest income, depreciation, Section 179 deductions, contributions and others. The amount reported for each shareholder should be the total Arkansas amount for an item of income, deduction or credit multiplied by the shareholders ownership percentage.

Arkansas Taxpayer Access Point (ATAP) is available for the filing of most Arkansas S Corporation Income Tax returns and tax payments. Federal returns and other required schedules may be attached with the ATAP filing or mailed separately to the Corporation Income Tax Section. The secure online filing, managing and payment options of ATAP are available at [www.atap.arkansas.gov](http://www.atap.arkansas.gov). Taxpayers and their authorized representatives will be able to view and manage their corporation income tax activity including other taxes administered by DFA. Accountants and attorneys must obtain permission from their clients to access and view their client's accounts.

### Pass-Through Entities Required To Withhold Income Tax

Pass-through entities are required to withhold income tax on the applicable distributions to non resident individuals that are attributable to income from other sources within the state. A pass-through entity is a business entity (corporation treated as a Subchapter S corporation, a general partnership, limited partnership, limited liability partnership, limited liability company, or a trust) **that is not taxed as a corporation for federal or Arkansas income tax purposes.**

**Pass-through entities may not withhold income tax on corporations, trusts, other pass-through entities or other businesses who are partners.**

The pass-through entity is required to file an annual return in electronic format that shows the total amount of income distributed or credited to its nonresident individual members and the amount of tax withheld and remit the tax on behalf of the nonresident individual member no later than the 15<sup>th</sup> day of the 4<sup>th</sup> month following the end of the tax year.

### EXTENSION OF TIME FOR FILING

If you have received an automatic Federal extension (Form 7004), the time for filing your Arkansas Corporation Income Tax Return shall be extended until the due date of your Federal Return for a US domestic corporation. When filing the Arkansas AR1100S, check the box at the top indicating that the Federal Extension Form 7004 **and/or** Arkansas Extension Form AR1155 has been filed and file the Arkansas return on or before the Federal due date. It is no longer necessary to include a copy of the Federal Form 7004. To request an initial Arkansas extension of 180 days from the original Arkansas return due date or an Arkansas extension of 60 days beyond the Automatic Federal extension due date, complete and mail Arkansas Form AR1155, Request for Extension of Time for Filing Income Tax Returns, by the due date or, if applicable, the extended due date of the Arkansas return to the Corporation Income Tax Section. Arkansas extension(s) must be attached to the Arkansas income tax return. Interest at 10% per annum is due on all returns (including those with extensions) if the tax is not paid by the original return due date. Interest will be computed on a daily rate of .00027397. To avoid interest and/or penalty, any tax due payment must be made on or before the 15<sup>th</sup> day of the 3<sup>rd</sup> month following the close of the Corporation's tax year. Attach your check to Extension Voucher 5.

The annual income tax return of a Small Business Corporation is to be submitted on Form AR1100S. Generally, a "Small Business" election permits the taxable income of the Small Business Corporation to be taxed to the shareholders rather than to the corporation. All resident and nonresident shareholders of S Corporations doing business in Arkansas must file a properly executed Arkansas Income Tax Return with the Department of Finance and Administration. Arkansas income tax must be paid on the shareholders' taxable income on an Arkansas AR1000, an AR1000NR for non resident filers or AR1000CR if filing on a Composite return with Arkansas Individual Income tax.

## PERIOD COVERED/ACCOUNTING METHOD

Application for changes must be made and forwarded to the Department of Finance and Administration, Corporation Income Tax Management, at least 60 days before the close of the proposed or new taxable year or period and/or accounting method. The corporation must provide to the Commissioner a copy of any certification or approval from the Internal Revenue Service authorizing the corporation to change its accounting method or income year.

## SIGNATURES AND VERIFICATION

The President, Vice-President, Treasurer, or other principal officer shall certify the return. Such agent may certify the return of a foreign corporation having an agent in the state. In general, taxpayers with income derived from activities both within and outside the State are required to allocate and apportion the net income under the following:

Business and non-business income defined – Article IV 1 (A) defines “Business Income” as income arising from transactions and activities in the regular course of taxpayer’s trade or business and includes income from tangible and intangible property if the acquisition, management, and disposition of the property constitute integral parts of the taxpayer’s trade or business operation. In essence, all income which arises from the conduct of trade or business operations of a taxpayer is business income. Income of any type or class and from any source is business income if it arises from transactions and activities occurring in the regular course of a trade or business. In general all transactions and activities of the taxpayer which are dependent upon, or contribute to, the operations of the taxpayer’s economic enterprise as a whole constitute the taxpayer’s trade or business and will be considered “Business Income” unless otherwise excluded by statute.

Business income is to be apportioned to this state by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor plus two (2) times the sales factor, and the denominator of which is four (4).

The property factor is a fraction, the numerator being the average value of the taxpayer’s real and tangible personal property owned or rented and used during the tax period and the denominator being the average value of all the taxpayer’s real and tangible personal property owned or rented and used during the tax period in this State.

The payroll factor is a fraction, the numerator of which is the total amount paid in this State during the taxable year by the taxpayer for compensation paid both within and without the State during the taxable year. The payroll factor shall include only that compensation which is included in the computation of the apportionable income tax base for the taxable year. Compensation is paid in this state if: (a) the individual's service is performed entirely within the state or, (b) the individual's service is performed both within and outside the state incidental to the individual's service within the state or, (c) some of the service is performed in the state and, (1) the base of operations (or if there is no base of operations the place from which the service is directed or controlled) is in the State or, (2) the base of operations or the place from which the service directed or controlled is not in any state in which some part of the service is performed, but the individual's residence is in the state.

The sales factor is a fraction, the numerator of which is the total sales of the taxpayer in this state during the tax period and the denominator of which is the total sales of the taxpayer everywhere during the tax period. The sales factor is then doubled.

Sales of tangible personal property are in this state if: (a) the property is delivered or shipped to a purchaser, other than the United States Government, within this State regardless of the f.o.b. point or other conditions of the sale or: (b) the property is shipped from an office, store, warehouse, factory, or other place of storage in this State and: (1) the purchaser is the United States Government or: (2) the taxpayer is not taxed in the State of the purchaser.

Sales, other than sales of tangible personal property, are in this State if the income producing activity is performed both within and without the State, in which event the income allocable to this State shall be the percentage that is used in the formula for apportioning business income to this State.

**Prior written approval is required before deviation from the allocation and apportionment method.**

### Apportionment Formula

For tax years beginning on or after January 1, 1995 (for all multistate corporations except financial institutions, airlines, bus lines, truckers and private railcar operators) business income is to be apportioned to this State by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor, plus double the sales factor, and the denominator of which is four (4). If a taxpayer does not have all four (4) factors, the denominator shall be the same as the number of entries other than zero (0) that apply to the total (everywhere) amounts of the property, payroll and sales factors. When double weighted, the sales factor counts as two (2).

For tax years beginning prior to January 1, 1995, the single weighted sales factor must be used. Construction companies, pipelines, publishing companies, railroads, and TV and radio broadcasters must utilize the double weighted sales factor, apportionment method with factor modifications. Requirements for apportionment formulas of the businesses listed in this paragraph (except for financial institutions) are contained in the Arkansas Corporation Income Tax Regulations which may be obtained from [www.dfa.arkansas.gov](http://www.dfa.arkansas.gov).

The following items of income to the extent that they do not constitute business income are to be allocated to this state:

1. Net rents and royalties from real property located in the state.
2. Net rents and royalties from tangible personal property:

- (a) if and to the extent that the property is used in this state  
or
- (b) in their entirety if the commercial domicile is in the state and the taxpayer is not organized under the laws of or taxed in the state in which the property is utilized.

The extent of utilization of tangible personal property in a state is determined by multiplying the rents and royalties by a fraction, the numerator of which is the number of days of physical location of the property in the state during the rental or royalty period in the taxable year and the denominator of which is the number of days of physical location of the property everywhere during all rental or royalty periods in the taxable year. If the physical location of the property during the rental or royalty period is unknown or unascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the taxpayer obtained possession.

3. Gains and losses from sales of assets:
  - a. Sales of real property located in the state.
  - b. Sales of tangible personal property.
    - (1) The property had a situs in this state at the time of sale, **or**
    - (2) The taxpayers' commercial domicile is in this state, **or**
    - (3) The property has been included in depreciation which has been allocated to this state, in which event gains or losses on sales shall be allocated on the percentage that is used in the formula for allocating income to the state.
  - c. Sales of intangible personal property if the taxpayer's commercial domicile is in this state.
4. Interest and dividends if the taxpayer's commercial domicile is in the state.
5. Patent and copyright royalties: If and to the extent that the patent or copyright is utilized by the taxpayer in this State, or if and to the extent that the patent or copyright is utilized by the taxpayer in a state in which the taxpayer is not taxed and the taxpayer's commercial domicile is in this State. A copyright is utilized in a state to the extent that printing or other publication originates in the state. If the basis of receipts from copyright royalties does not permit allocation to the states or if the accounting procedures do not reflect states of utilization, the copyright is utilized in the state in which the taxpayer's commercial domicile is located.

If the allocated and apportionment provisions as set out above do not fairly represent the extent of the taxpayer's business activity in this state, the taxpayer may petition for, or the Director of Revenue, Department of Finance and Administration may require, in respect to all or any part of the taxpayer's business activity, if reasonable:

  1. separate accounting
  2. the exclusion of any one or more of the factors
  3. the inclusion of one or more additional factors which will fairly represent the taxpayer's business activity in this state, or
  4. the employment of any other method to effect an equitable allocation and apportionment of the taxpayer's income.

# FINANCIAL INSTITUTIONS

In general all state and national banks, savings and loan, building and loan associations or any other entity operating as financial institutions are to be taxed under existing law. For a complete definition of “financial institution” refer to **ACA 26-51-1402**.

## Who must file:

- 1) A financial institution having its principal office in this State shall be taxed as a business corporation organized and existing under the laws of this State, **or**
- 2) A financial institution having its principal office outside this State but doing business in this State shall be taxed as a foreign business corporation doing business in this State.

This is not intended to recognize the right of a foreign financial institution to conduct any business in this State except to the extent and under the conditions permitted by any acts or any other now existing applicable laws of this State.

**ACA 26-51-702** requires any taxpayer having income from business activity which is taxable both within and without this state, other than activity as a public utility or the rendering of purely personal services by an individual, shall allocate and apportion their net income.

**ACA 26-51-426** adopted Internal Revenue Code Sections 582, 585, and 593 as in effect January 1, 1999 regarding bad debts of financial institutions.

**ACA 26-51-1401** et seq. adopted the Multistate Tax Commission regulation regarding apportionment and allocation of net income of financial institutions. It requires that a financial institution whose business activity is taxable both within and without this State to allocate and apportion its net income to this State. All business income which is includable in the apportionable income tax base, shall be apportioned to this State by multiplying such income by the apportionment percentage which is determined by adding the receipts factor, property factor, and payroll factor and dividing the sum by three (3).

## Receipts Factor:

Generally, the receipts factor is a fraction; the numerator is the financial institution’s gross receipts in Arkansas during the taxable year, and the denominator is all gross receipts that the financial institution derives from transactions and activities in the regular course of its trade or business. Interest from loans secured by real property is attributed to Arkansas if the property is located in Arkansas. Interest from loans not secured by real property is attributed to Arkansas if the borrower is located in Arkansas. Interest from credit cards receivables and fees charged to card holders are attributable to Arkansas if the billing address of the card holder is in Arkansas. Net gains from the sale of loans and loan servicing fees are sourced in the same manner as the loan interest. Net gains from the sale of credit card receivables are sourced in the same manner as the interest on credit card receivables. Interest, dividends, and net gains from investment and trading assets and activities are attributed to Arkansas if such receipts are property assigned to a regular place of business of the taxpayer within Arkansas. Financial institutions must single weight the sales factor.

## Property Factor:

Generally, the property factor is a fraction, the denominator includes the average value of all owned and rented real and tangible personal property used by the financial institution in its trade or business. The property factor also includes two intangible assets, loans and credit card receivables, which are valued at their average outstanding principal balance, without regard for any reserve for bad debts, but reduced by any amount written off for federal income tax purposes. The numerator includes the average value of real and tangible personal property owned or rented by the taxpayer that is located or used within Arkansas during the taxable year and the average value of the taxpayer’s loans and credit card receivables that are located in Arkansas during the taxable year. Loan and credit card receivables are attributed to Arkansas if they are property assigned to a regular place of business of the taxpayer within Arkansas. A loan or credit card receivable is properly assigned to the place of business which they have a preponderance of substantive contacts with as determined by such activities as the solicitation, investigation, negotiation, approval and administration of the loan or credit card receivable.

## Payroll Factor:

Generally, the payroll factor is a fraction, the numerator of which is the total amount paid in this State during the taxable year by the taxpayer for compensation and the denominator of which is the total compensation paid both within and without the State during the taxable year. The payroll factor shall include only that compensation which is included in the computation of the apportionable income tax base for the taxable year.
